

JERISH J | FullStack Developer

Guduvancheri, Chennai | +91 9597837910 | jerishj58@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Aspiring Full Stack Developer with experience in Python, Flask, PostgreSQL, HTML, CSS, and JavaScript. Built REST APIs, authentication systems, and CRUD applications with frontend-backend integration. Skilled in database management, API testing using Postman, and version control using Git and GitHub. Passionate about building scalable web applications and improving problem-solving skills.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

Backend: Flask, REST API

Database: PostgreSQL

Frontend: HTML5, CSS3

Tools: Git, GitHub, Postman, VS Code

PROJECTS

Login & Authentication System (Flask + PostgreSQL)

Tech Stack: Python, Flask, PostgreSQL, REST API, Postman

- Built a secure backend authentication system with user registration and login functionality
- Integrated PostgreSQL database for storing and managing user data
- Developed REST APIs using Flask for handling authentication workflows
- Validated API endpoints using Postman with successful request/response testing

CRUD REST API Web Application using Flask & PostgreSQL

Tech Stack: Python, Flask, PostgreSQL, REST API

- Developed 5+ RESTful APIs for CRUD operations using Flask and PostgreSQL
- Implemented structured backend architecture using Flask framework
- Connected application with PostgreSQL for persistent data storage
- Handled HTTP requests and JSON responses for frontend/backend communication

SQL & Database Management Project

Tech Stack: PostgreSQL, SQL, Database Design, pgAdmin

- Designed relational database schema using PostgreSQL

- Implemented SQL operations including SELECT, INSERT, UPDATE, and DELETE
- Optimized queries and managed table relationships
- Developed understanding of backend data modeling and normalization

EXPERIENCE

Backend Development Intern – FABC

Duration: 1 Month

- Worked on backend development tasks in a blockchain-related environment
- Assisted in implementing backend logic using Python and Flask
- Performed debugging and API testing for request/response validation
- Tested REST APIs using Postman for workflow validation
- Gained exposure to backend architecture and blockchain-based systems

EDUCATION

Btech Information Technology - KALASALINGAM ACADEMY OF RESEARCH AND EDUCATION

2022 – 2026 | CGPA: 7.41

CERTIFICATION

Backend Development – FABC

Covered REST API development, Flask framework, PostgreSQL integration, and backend architecture fundamentals
